EURO-IMPULSE ELECTRONIC ANTISCALE

EUROIMPULSE 2000

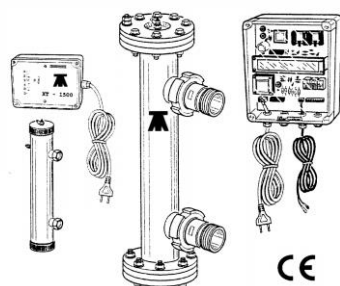

EUROIMPULSE 7000..

Thanks to the electronic pulses generated by central unit, the Euroimpulse series modifies the crystalline structure of water, thereby preventing the aggregation of calcium. A correct use of these devices helps to block scaling formation and ensures the long life of the system.

Treatment chamber: AISI304.

T max: 70°F – Pmax: 10 BAR – POWER SUPPLY: 220V – 50 Hz

	CONNECTION	FLOW
EUROIMPULSE 2000 E	1"	2000 lt/h
